

Wm Grant & Sons – Distillery Upgrades, Girvan

Wm Grant & Sons Distillers instructed Krones UK to build a new distillery at their Girvan site. Krones, in turn, appointed JBD Trittec Ltd as their mechanical contractor for the project.

The project programme lasted 14 weeks, JBD Trittec's scope of works included the installation of all equipment, including 12 washbacks, a lauter tun, process tanks, and the supply and installation of all product and service pipework, including spirit, steam, condensate, spent grains and CIP pipework.

Additional works included the modification of various existing tanks and the manufacture and installation of a pipebridge. Working closely with Krones, our engineers completed the task on time and on budget.

The successful completion of this the first phase of the project resulted in JBD Trittec securing the second phase of the work in early 2013. Our scope of works this time was increased to include the design, fabrication and installation of a full steel gantry system to accommodate washbacks, mash tun and stills.
